The EDON Story

In 1963, one frustrated foreman was responsible for starting a very revolutionary trend in construction. For days at the Rossmoor Leisure World site in Cranbury, New Jersey, bricklayers, sheet metal trimmers, roofers, painters, carpenters, masons and laborers had been working at building and installing chimneys on what was then to be the largest retirement community on the East Coast. The problems encountered were predictable, "too many man-hours - over budget". Soon thereafter that same foreman was watching chimneys being installed in 20 minutes...by just two people. Furthermore, they fit every time, are completely impervious to weather and will last as long as the dwellings to which they now belong. Fiberglass and prefabrication have made the difference. But even more than that, design and ingenuity are the true authors of the story...and EDON Corporation.

Spanning a Half Century of Architectural Expertise

Government - Court Houses, City Hall, Judiciary Buildings, Municipalities, Police and Fire Stations

Education - K-12, Private Schools, Colleges, Universities

Commercial - Cellular, Office Buildings, Store Fronts, Corporate Buildings, Hotels & Casinos

Religious - Churches, Temples, Mosques, Synagogues

Custom Capabilities - Historic Reproductions, Signage, Creative Sculpture

Services

**CAD • Design • Engineering • Fabrication • Manufacturing
Molds • Patterns • Production • Sculptures • Shop Drawings**

EDON Corporations facilities comprise 60,000 sq. ft. of Design, Engineering and Manufacturing space located on its 4.5 acre site in Horsham Pa., (suburban Philadelphia), only an hour and a half from New York, Atlantic City and PA Poconos.

Straight Shaft Tuscan Column Covers are just as the name applies. Straight from top to bottom.

Tapered Style Tuscan Column Covers become gradually narrower or thinner toward the top of the shaft.

Entasis Style Tuscan Column Covers have a slight convexity or swelling, as in the shaft of a column, intended to compensate for the illusion of concavity resulting from straight sides.

EDON Fiberglass Pilasters are light-weight and cost-effective

Column Covers

Decorative Capitals

Corinthian, Tuscan, Ionic, Scamozzi, and Temple of the Winds capitals are available individually or can be combined with many standard **EDON** column covers and pilasters. Custom capitals can be made to architectural specifications. Tuscan or custom capitals may be molded as an integral part of the column (one piece). Bases are molded separately in two sections for ease of installation around internal supporting structure.

Column Cover Joint Details

Lap Joint

- This joint is to be filled & finished for a seamless column.
- Column is to be painted in the field as desired.
- Typical applications are for installations in a high traffic area with a permanent application.

Butt Joint

- This joint is an exposed joint.
- One side is mechanically fastened to a supporting structure. Second side is attached with adhesive.
- Available in various colors & textures, but we recommend the column to be painted in the field.

Reveal Joint

- This joint allows for removal of column cover for access.
- Column and accent strip available in various colors and materials.
- Typical applications are for installations that hide important wiring or plumbing that may need to be easily accessed at a later time.

Column Cover Installation

EDON Column Covers are molded in 1/2 sections with either lap joints, butt joints or reveal joints for ease of assembly and installation.

Material: Fiberglass Reinforced Polyester (FRP) molded with Class A fire-rated resins, low smoke density, are available in a variety of colors and finishes.

Shop Drawings will show dimensions, thickness, and attachment details for installation prior to construction.

Installation Instructions

1. BLOCKING - Block out from existing or new vertical structure for attachment of both column halves at seams. Ensure blocking is plum and level. Pre-fit both halves of the column blocking to insure proper fit. If material is too thick, unfinished side can be easily grinded or sanded down to properly fit over lap joint. If material appears too thin, prepare to shim, so surfaces fit plumb.

2. FASTENING - Predrill and countersink holes according to the type of fastener being used. You may either use construction adhesive or EDON supplied Thick Mix. Starting at the top and working down, fasten the first column cover half with either screws or pop-rivets to blocking per previous instructions. Apply Thick Mix or construction adhesive to seams of both installed & uninstalled halves. Upon fastening both sections, wipe off excess Thick Mix/adhesive.

3. PATCH & FILL - Quickly position remaining column half, then fasten. Clean off excess Thick Mix with acetone. Repeat the previous steps to install column base. Sand the columns approx. two (2) inches on each side of the joint, using grade #200 sandpaper. Apply masking tape vertically on the columns, two (2) inches on each side of the joint and apply a thin layer of polyester body filler over the joints and fasteners.

4. SAND - Sand smooth and prime the body filler sections of the columns. You are now ready for the final finishing coat. Scuff entire column with Scotch-Brite® pad to prepare for painting.

5. FINAL PREP - Remove tape and feather body filler into the columns.

6. Preparing for paint

- A.** Wipe down the column covers with a wax/grease remover.
- B.** Lightly sand the column cover with sandpaper (200-400 grit or Scotch-Brite®).
- C.** Wipe with clean cloth.
- D.** Prime column covers if you are using a water based paint. It is not necessary to prime other paints.
- E.** Make sure the areas that have patch and body work are primed prior to painting.

DISCLAIMER: EDON Corporation is a material supplier only and assumes NO liability for installation of the Fiberglass components nor any other materials used on the project. EDON is not responsible for the unloading or storage of its product nor for post finishing, painting or attachments of objects or materials furnished by others. Professional Engineering is the responsibility of the Architect/Contractor.

Load Bearing Fiberglass Columns

EDONiTE™

EDON, a leader in fiberglass architectural innovation, now supplies load bearing fiberglass columns ranging from 6" to 36" in diameter with heights from 8' to 28'. **EDONiTE™** load bearing columns combine two different technologies to provide a wide range of sizes and affordability. The smaller diameter columns are fabricated from a Class 1 fire-rated poly/marble composition. Larger diameter columns use FiberWound technology to create a Class 1 rated durable and lightweight load bearing column, with the impact resistance and very high load bearing capabilities that are achieved without excessive weight.

EDONiTE™ load bearing columns are available with a variety of capital and base styles. Column styles can vary from straight to entasis, square in plan and fluted.

The chart lists recommended dead load values. These loads apply to full columns installed according to EDONiTE™ installation instructions. All split columns and pilasters are non-load bearing. Load is to be applied concentrically through axis of column. Loads are valid only if applied uniformly between full area of column shaft ends. Load values are provided as a convenience and are not exact. Consult a structural engineer for accurate load estimates.

LOAD RECOMMENDATIONS

COLUMN DIA.	LOAD IN LBS.
12"	6,000
14"	8,000
16"	10,000
18"	12,000
20"	14,000
22"	16,000
24"	18,000
30"	24,000

All EDONiTE™ Columns require painting after installation. EDONiTE™ Columns are weatherproof, insect-free and low maintenance.

Balustrade Systems

Fiberglass Balustrades

Office Building, Coudersport, PA

EDON Fiberglass Balustrade Systems are best utilized when either replacing an existing system or as a decorative element to a building.

Polyurethane Balustrades

High Density Polyurethane makes an affordable and elegant choice for a balustrade system. Free from rotting, warping or cracking, our lightweight systems meet local and state building codes. During the molding process, each piece has a finish paint chemically bonded to it. Like most of our polyurethane products, a top coat of exterior paint is recommended.

Original 100 year old baluster

New reproduction

New or old, residential or commercial, polyurethane millwork can replicate products made 100 years ago by the finest craftsman.

4" BALL RULE

This well known and standard code for balustrade systems requires that a 4" ball must not pass between any two balusters.

Residential projects

(most areas) Railing height must be 36" high to pass code.

Commercial projects

(most areas) Railing height must be 42" high to pass code.

Balustrades are light-weight and built for endurance

Dome Installation

STANDARD DOME

STANDING SEAM DOME

PREFITTED BOLT FLANGE ASSEMBLY

EXTERIOR FINISH SURFACE

INTERIOR FINISH SURFACE

STANDARD DOME

INTERIOR BOLT FLANGE MOLDED STANDING SEAM

EXTERIOR BOLT FLANGE MOLDED STANDING SEAM

EDON manufactures exterior domes with internal bolt flanges and smooth exterior surface. Special orders include exterior bolt flange with molded standing seam look & internal flanges with exterior clips and molding standing seam applique.

Interior

Each section has been pre-drilled, pre-fitted & numbered at the factory. Set up piece number 1 on a flat surface.

Apply sealant liberally to bolt flanges and put together with supplied hardware.

After final part is installed, seams may be spackled with polyester "bondo". Allow to dry, sand then paint.

Interior domes can be installed thru the baseflange and/or hung from above thru the bolt flange.

Exterior

Depending on the size of the dome, you can install in place or put together on the ground (making sure of level surface) and lift in place.

Dome sections are pre-drilled, pre-fitted and numbered in sequence for bolting to each other.

Prior to final fitting, apply sealant liberally to bolt flanges and tighten.

Interior Gypsum Domes

(GRG) Glass Reinforced Gypsum Interior Domes

GRG Interior Domes can be used with light troughs, medallions, chandeliers and recessed lighting in both commercial and residential applications. They can also be combined with a hanging light fixture, an indirect lighting ring, or stand alone as a decorative addition. **GRG Interior domes are available in over 40 diameters, from 8" to 10'.** Please call for further details.

EDON also offers additional architectural ornamentation in GRG. Please call for details.

Polyurethane Millwork

Lightweight, Moisture Resistant, Maintenance-free, Primer Coated

Interior and Exterior

EDON presents a new line of high-density polyurethane millwork, pressure molded to achieve a density similar to pine molding with the ability to replicate items to meet your design requirements.

EDON can create any style of millwork using existing drawings, molds or designs – or create a custom one-of-a-kind design. Polyurethane does not rot, so it can offer longevity that far exceeds comparable components created with wood, without compromising it aesthetically. Polyurethane can simulate wood, resulting in a structurally sound architectural enhancement to your remodeling or building project.

ARCHES • BALUSTRADE SYSTEMS • BRACKETS • CORNICE • DENTIL BLOCKS • DORMER & DORMER TRIM
ENTRANCES • LOUVERS • MEDALLIONS • MOLDINGS (INTERIOR & EXTERIOR) • REPRODUCTIONS

Bank of America, Wilmington, DE

Compared to other traditional materials, the total life-cycle assessment of fiberglass contributes to its viability as a green building product. When consideration is taken for the energy consumed in production, installation and environmental sustainability, fiberglass products generate a much smaller impact than other traditional materials and can be used in ways that are less energy or carbon intensive.

Green building has become an increasingly important focus for new construction. The LEED Program (Leadership in Energy and Environmental Design) was developed by the U.S. Green Building Council to provide a framework for implementing practical and measurable green building solutions. Voluntary participation in the program demonstrates initiative to develop **high performance sustainable buildings** with energy savings, lower carbon footprints, and environmental responsibility.

Reduce environmental impact with durable, long-lasting EDON Fiberglass

Cornices

Fiberglass is often chosen over other construction materials for having a life cycle that exceeds other products by resisting rust, rot and corrosion. This increased, useful lifespan reduces the need for replacement, repair or repainting. The durability and low maintenance of fiberglass designates it as an environmentally sustainable material.

Court Houses, Judiciary Buildings and Military Facilities

Borough of Lincoln Park, Morris County, NJ

Lewis County Justice Center, Vanceburg, KY

West Point Auditorium and Fine Arts Center, West Point, VA

Achieving certification through LEED assures that buildings are constructed as intended. **EDON** can help achieve that goal by providing building products that are environmentally and economically friendly.

A partial list of municipal facilities for which **EDON** has produced architectural fiberglass components: Burlington Town Hall Annex, MA • Burlington Town Hall, VT • Cameron County Library, PA • Candor Town Hall, NY • Chicago Police Headquarters, IL • Churchill County Courthouse, NV • City of Fountain Municipal Office, CO • Clarion County Courthouse, PA • Crawford County Administration Building, OH • Dalzeil Administration Building, CA • Don North Municipal Building, OH • Fluvanna County Public Safety Building, VA • Franklin County Justice Center, PA • Glen County Courthouse, CA • Hardin County Justice Center, KY • Harrisburg Town Hall, PA • Harrisburg State Capital Building, PA • Highland County Courthouse, OH • Hugo City Hall, MN • James City Courthouse, VA • Kern County Museum, CA • Leewood City Hall, KS • Lewis County Courthouse, KY • Licking County Courthouse, OH • Long Hill Municipal Building, NJ • Marion County Administration, OH • Mitchell County Courthouse, NC • Oakland Administration Building, CA • Philadelphia Police & Firehouse, PA • Saline Municipal Building, MI • Stark County District Library, OH • Sullivan County Courthouse, TN • Tupelo City Hall, MS

Financial Institutions

Southern Community Bank, NC

First National Bank, TN

SECU Credit Union, NC

Chase Bank, TX

The Citizens Bank, GA

Bank of America, Flourtown, PA

Alliance National Bank, GA

What sets these financial institutions apart from the others is architectural ornamentation by **EDON**. Many times a first impression is what sells and by using **EDON** fiberglass products to adorn your building, a distinct advantage is achieved.

Custom Canopies, Awnings and Entrances

Washington Convention Center, Washington D.C.

Showboat, Atlantic City, NJ

Claridge, Atlantic City, NJ

Throughout the USA, **EDON**'s long-lasting fiberglass canopies, awnings and entrances make a unique design statement at the entryways of numerous noteworthy buildings.

Simulators

Aerospace, Commercial and Entertainment

Interior & exterior fiberglass simulator shell - Fidelity Flight Simulator, Pittsburg, PA

Fiberglass entertainment simulator, NJ

EDON, partnering with Display Solutions, designed, tooled and manufactured the Air Traffic Control Training Simulator at Middle Tennessee State University. The unique 360° fiberglass conical screen provides realistic images for advanced aviation training.

Verizon Communications, Paoli, PA

Ridgefield, CT

Enclosures

Fiberglass enclosures for wireless communications, HVAC units and rooftop concealment. **EDON** has produced numerous RF structures...from stand-alone units to historic reproductions.

EDON fiberglass enclosures can be used to conceal wireless communications as well as HVAC units. World renowned university testing proved **EDON** fiberglass excelled in transmitting cellular, PCS and microwave band frequencies. In addition, aesthetically appealing communication enclosures can be disguised as historic reproductions indistinguishable in appearance to existing building materials, but with all the benefits of light-weight, durable fiberglass.

Reproductions

When original materials and skilled craftsmen are unavailable, historical and preservation committees agree that **EDON** FRP is an excellent solution for restoration needs.

EDON's ability to reproduce the sizes and shapes of complex configurations allows the architect the freedom to replicate historical detail without sacrificing authenticity.

Historic Entrance, Widener Building, Phila., PA

3300 YEARS AGO...

The Metropolitan Museum of Art commissioned EDON to recreate an exact 27' replica of the original statue of Ramesses the Great. From the Golden Age of Egypt, 1279 BC, Ramesses greets visitors today at the entrance of the Memphis Coliseum in Tennessee.

Moroccan Pavilion and the Koutoubia Tower at EPCOT and Pantages Theater, Universal Studios, FL

EDON reproduced and replaced the oldest Church Steeple in New Jersey (Circa 1752). A totally new and exact fiberglass replica provides cellular transparency for a major communications link. Neshanic, NJ

EDON AND LEED

Maximize the number of LEED credits by understanding how **EDON** Fiberglass can contribute to the success of your project.

In 1995 the LEED Green Building Rating System was established as the national standard in "Green Building" by the U.S. Green Building Council. **EDON** Fiberglass is a viable alternative to traditional materials. Its ability to reproduce the look of many popular building materials allows the freedom to design without sacrificing an authentic look and providing numerous advantages as an environmentally sustainable solution.

One of the goals of the LEED program is to incorporate recycled content in the finished product. **EDON** Fiberglass is now able to offer a Green Technologies Class A Fire Rated Resin that has combined renewable bio-derived content and/or recycled content of 24%. This breakthrough in composites technology allows **EDON** to fabricate the same first class product using new technology to contribute to LEED credits without sacrificing quality of physical properties.

University of Miami Ohio,
Farmer School of Business, OH

LEED advantages of **EDON** Fiberglass include, but are not limited to:

- *EDON fiberglass lasts longer and requires less maintenance than other standard building materials because it resists moisture, corrosion, weather and insects.*
- *EDON's high quality gel-coat finish reduces the need to use paints.*
- *Low thermal conductivity reduces energy consumption for heating and cooling.*
- *Lightweight fiberglass reflects a reduction in transportation time and fuel costs.*
- *FRP is generally custom molded to size and shape thereby minimizing waste at the job site.*
- *Recycled material used in manufacturing.*

Wake Forest University, Winston-Salem NC

EDON Fiberglass contributes to LEED credits in the following categories:

- Energy Performance EA 1,2
- Construction Waste Management MR2.2
- Recycled Content MR 4.1, 4.2
- Innovation in Design 1.1
- Durability ID2.1
- Pest Control SSc5
- Materials and Resources MR Credit 5

EDON Fiberglass combines the use of standard profiles with the custom design of the architect to achieve the desired look as well as LEED certification.

EDON FIBERGLASS

"All of EDON's products are made in the USA and we are proud of it"

Products:

Awnings
Bases
Brackets
Balustrades
Canopies
Capitals
Column Covers
Cornices
Cupolas
Domes
Finials
Pilasters
Reproductions
Shutters
Spandrels
Spheres
Spires
Surrounds
Urns
Telecoms

Services: CAD • Design • Engineering • Fabrication • Manufacturing
Molds • Patterns • Production • Sculptures • Shop Drawings

EDON WARRANTY

1. EDON shall warrant fiberglass reinforced polyester (FRP) products to be free from defects in materials and workmanship for a period of one year from date of delivery to the project site and if defects in materials and /or workmanship should appear within the stated period of warranty, EDON shall replace same without additional cost to the Owner. EDON's warranty shall be limited to replacement of defective FRP products. The General Contractor shall remove defective units and install replacement items without additional cost to the Owner or Manufacturer.

2. EDON's Warranty shall be based on installation methods in conformance with EDON's recommendations and instructions. EDON's warranty shall not cover damage to FRP products caused by acts of God or structural, mechanical, electrical defects and defects of adjacent materials furnished and installed by other trades.

FLAME RETARDANT RESINS, Class 1. Offers a wide variety of flame retardant properties. Engineered specifically for building products and a myriad of other interior and outdoor applications. Meets the most exacting requirements of local fire codes, BOCA, DOT, IBC and other government specifications.

TYPICAL PHYSICAL PROPERTIES OF FRP

Properties	1/8" Unfilled Casting	1/8" Glass Laminate
Flexural Strength, psi 77° F	16,000	30,000
Flexural Modulus, psi x 10 ⁶ , 77° F	0.48	1.3
Tensile Strength, psi 77° F	8,700	18,000
Elongation, %	2.2	—
Barcol Hardness	45	50-55
Glass Content, %	—	29.8

FLAMMABILITY PROPERTIES OF FRP*

(1/8" Glass Mat Laminate)	
ASTME-84 (tunnel test) flame spread.....	less than 25 (unfilled)
smoke density.....	less than 380 (unfilled)
HLT-15 Rating.....	100
ASTM D-635-74.....	AEB<1.0 CM
	ATB<5 sec.
ASTM D-2863-74 (Oxygen Index).....	36.5
