EC-110T	42"	14'-0"	4'-8 3/4"	2'-0 5/8"	4'-10 7/8"	2'-0 5/8"

**Notes:**

Straight shaft column covers can be made approximately 1/3 taller than the mold height, in the mold, or they can be made to almost any height by stacking sections. There is no minimum height.

All fabricated in vertically split halves with a vertical lap joint, unless butt or reveal joints have been specified.

Capital is integrated with the shaft; Bases are separate pieces.
